Thank you for your cooperation in the efforts to keep the UCR environment safe and healthy! We want students, staff and visitors to enjoy their experience here. As a Safety Partner, you can help make this happen. EHS has created this page with resources that can help the UCR community be in a safe and healthy environment.

Your Responsibilities
UCR Safety Partners have the following responsibilities:

- Review UCR’s emergency procedures
- Assist in the implementation of program responsibilities within their department or location
- Help the department focus on General Safety, Laboratory Safety (as applicable), and Emergency Preparedness
- Report hazardous conditions and releases to the environment
- Investigate and report all accidents/injuries and request medical treatment if required

We recommend you and your employees* take the General Safety Orientation for an overview of campus safety policies, programs and resources. If you work in a lab, you and your employees* need to take the Laboratory Safety Orientation.

We want the UCR community to be safe and healthy. Please contact us by email at ehs@ucr.edu or by phone at (951) 827-5528 with suggestions to make this page more useful for you.

* All faculty, staff, students, volunteers, and guests performing work on or for the UCR campus.

Visit [http://ehs.ucr.edu](http://ehs.ucr.edu) for additional information.
