

# 12 MONTHS OF RESEARCH SAFETY

## MARCH 2021

# CHEMICAL INVENTORY CERTIFICATION

Having an accurate inventory is a necessary part of working with chemicals in a laboratory. Lab workers have a right to know the hazards of the materials they are working with, and the campus inventory is used by first responders in emergency situations.

Annually certifying your chemical inventory is an important step in the process.

## Making sure your inventory is accurate

The UC Chemicals app makes managing your inventory easy. All labs must use UC Chemicals for inventory reporting (local, state and federal regulations).

### Go Mobile

Available for iOS or Android.

### Barcode Scanning

Use the app's barcode scanning capabilities to manage or share inventory.

### Track and Maintain

Easy tracking and maintenance of containers using a barcoding system.

### Safety Info

Populates chemical details and safety information, such as hazards, health and storage handling and first aid information.

Once you have added all materials in the lab to your inventory, the Principal Investigator or Supervisor can certify the inventory.

### Get the app:

<https://ehs.ucop.edu/chemicals/>

### iOS

### Android

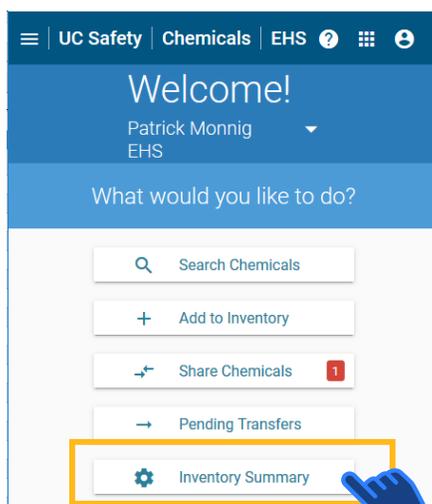

### Include:

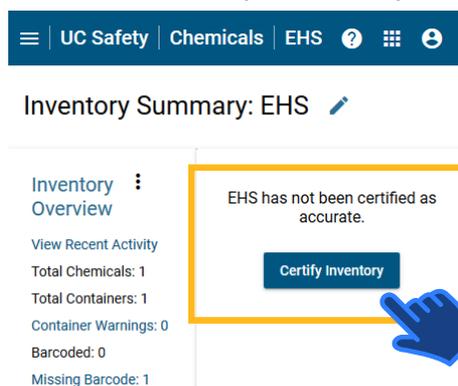

- Chemical reagents
- Gas cylinders
- Industrial chemicals

## Annual Certification of Your Inventory

1. From your inventory, click on "Inventory Summary"

2. On the right side of page, click "Certify Inventory"

3. You are done!

Complete this process on at least an annual basis
